

# A WORD FROM A WORLD-CHANGER

*Kenzie Biggins*  
WORXBEE

**1 What makes an entrepreneur different from most humans?** This is key: there's the person who talks about it, and there's the person who does it. Lots of people will spend eight years working on a business plan; but an entrepreneur is the person who thinks, I'm just gonna jump off the cliff. Let's see if I can fly. It's a mentality of being willing to take risks.

**“Here, we focus on abundance for everyone, on collaborating and really winning together.”**

**2 Describe your business in a nutshell.**

We are an executive assistant solutions company. I think a lot of people don't realize how important the role is – but an executive assistant is an integral part of your executive team. We provide everything from permanent placement and virtual executive assistance support, to consulting on how corporations use executive assistants, and we're even getting ready to roll out new training and professional development resources.

**3 Why is Greenville the place you chose to create your business?**

I got to this three year mark and was floundering. I didn't know how we were going to move the business forward. I was getting frustrated, nothing was working. So I decided to call on people I knew in Atlanta to see what I missing. They told me that Greenville can do more for me right now as a black female entrepreneur [than Atlanta]. I've been here since 2017, and we've quadrupled the size of our business.

There is an environment of collaboration here. When you're in a big city, it's very much a battle of the fittest. Here, we focus on abundance for everyone, on collaborating and really winning together.
